

Compact and convenient push sweeper
for indoors and outdoors

KM 70/20 C sweeper in detail:

With the KM 70/20 C, you can sweep up to seven times faster and more economically than with a conventional broom. It is a true allrounder and an indispensable aid for all users, including contract cleaners, caretakers, farmers and hotels.

Push handle

- The push handle can be set to three different positions to suit the height and reach of the user and guarantee fatigue-free operation.
- The push handle folds down completely to save storage space.

Dustpan and brush principle

- Dirt picked up by the roller brush is conveyed directly into the waste container.
- A minimum of physical effort is required, the sweeper is easy to handle and creates very little dust.

Main roller brush and side brush

- The main roller brush can be raised or lowered to one of 6 settings to suit the surface being swept.
- The contact pressure of the retractable side brush is infinitely variable.

Waste container

- A built-in fine dust filter retains the dust created during sweeping to keep the air clean.
- The ergonomically shaped container handle ensures easy handling and emptying.

Technical Data		KM 70/20 C
Order No.		1.517 - 101
Area swept at 4 km/h	m ² /h	2,800
Sweeping width without side brush	mm	480
Sweeping width with side brush	mm	700
Waste container capacity gross/net	l	40/20
Empty weight	kg	23
Dimensions H x L x W (folded)	mm	385 x 980 x 765
Dimensions H x L x W (ready for operation)	mm	1035 x 1300 x 765
Included in scope of supply: Side brush, main roller brush, fleece filter		

Drive

- The main brush roller is driven via the two wheels. The KM 70/20 C therefore sweeps equally efficiently in left-hand and right-hand bends and offers excellent straight-line control.
- The metal pinion drive is extremely rugged and has a long service life.
